Valter Moto Components

Ogni singolo prodotto Valter Moto Components è stato concepito con cura e realizzato artigianalmente da uno staff che lavora quotidianamente con passione e impegno per offrire il massimo della qualità.

Un qualificato Team di tecnici ha studiato e sviluppato ogni minimo dettaglio per garantire le più alte prestazioni in qualsiasi utilizzo, mantenendo l'eleganza che da sempre caratterizza il nostro brand e il "Made in Italy".

L'anima di ogni particolare che produciamo è la lega di alluminio aeronautico Ergal 7075 T6 da cui i componenti vengono ricavati utilizzando frese e centri di lavoro CNC di ultima generazione. Successivamente i particolari vengono sottoposti ad un processo di ossidazione anodica per assumere l'aspetto estetico finale ed offrire in pochi micron una vasta gamma di colori classici e di tendenza.

Con incredibile delicatezza ogni pezzo viene poi marchiato con tecnologia laser per avere la nostra firma, la nostra convinzione che vestiamo e miglioriamo le prestazioni della tua moto. Per arrivare a questi standard siamo da sempre impegnati e in costante collaborazione con i piloti di diversi campionati nazionali e mondiali che con il loro lavoro ci aiutano a migliorare e a trovare soluzioni innovative e proiettate al futuro. Siamo orgogliosi di aver contribuito con i nostri prodotti alle loro vittorie che diventano in piccola parte anche nostre.

Every single Valter Moto Components product is designed by a qualified team of engineers and handcrafted by artisans caring for every single detail.

We work with passion and commitment to offer the highest quality for the best performance under any circumstances, maintaining the elegance that has always characterized our brand and the "Made in Italy" design.

The soul of each item we produce comes from the aeronautic aluminum 7075 T6 alloy from which the components are billet made using latest generation CNC machinery. Afterwards our parts are subjected to an anodic oxidation process to achieve the final look and to offer, with just a few microns layer, a wide range of classic and trendy colors.

Each component is finally marked with laser technology: it now carries our signature, which also certifies our full commitment in dressing your bike and improving its performance at the top level. To reach these standards we partnered along the years with the riders of the top National and World Championships, and their work helps us to improve our products and develop new and innovative solutions. We are proud to have contributed with our components to their victories, we feel them a little bit ours also.
